This is free version and available for demo version. Autodata Para Windows 8 DOWNLOAD: Autodata can diagnose and read data from almost all vehicles of any brand, including OBD II vehicles. It is the only application that can read and display data of all the modern OBD II-compatible vehicles. I have tried the snapshot installation method many times. But still no luck. I am using Windows 10 Enterprise. Has anybody any idea.? Sun Apr 20 00:12:29 2016 From the times when I have tried to install the Autodata solution, I have been unable to proceed with the installation. I don't see any icon on the desktop either. I have tried a couple of techniques like through Run Click Start -> All programs -> AutoData (or AutoData Professional) -> Click the Settings icon -> Select Details tab -> Click "View" in the "Startup Location" field -> Choose "Use a custom location" -> Type "C:\autodata\autodata.exe" in the browse window -> Press "OK" -> Click "Start" Now, you will see the AutoData in the StartUp tab of the Start menu. I hope that this is the right way to do it. But what I see is, I see a shortcut for AutoData in the folder Windows\System32\imapps folder. But I am not able to locate the installation file. Please help. Sun Apr 20 00:12:29 2016 what are the directories to locate the autodata file? Sun Apr 20 00:12:29 2016 I am using windows 10 pro 64 bit. May 13, 2017 How to download auto data for windows 8/10/7 UITableView in a tab bar controller does not show the default table cell separator I have a UITableView embedded in a UITabBarController, and I have created a custom cell on the first UITableViewController so that the text on the table cell goes across the entire cell. The problem is that the TableCell separator (the line in the middle of the cell) is not showing. Here is how I implemented the cell: let cell = CustomerTableViewCell() override func viewDidLoad() { super.viewDidLoad() // Do any additional setup after loading the view. cell.textLabel?.text = customer.name cell.accessoryType = UITableViewCellAccessoryType.DisclosureIndicator self.tableView.reloadData() } I have also set self.tableView.separatorStyle = .none so that there is no table cell separator. A: You need to set the style of your separator: self.tableView.tableFooterView = UIView() self.tableView.separatorStyle = .none Mayor Bill de Blasio on Monday urged city residents to avoid public spaces in favor of avoiding large crowds of people as the
