Text Video [32|64bit]

This software allows you to convert your favorite video format into special text format. Format of file is not distorted and can be opened in any text editor or text viewer. You can watch it either in 80x50 (TXT) or 320x200 (BMP) mode, customize the text color, font, size, width and height, put your own text in it. This text can be placed next to video, you can play it in background, make it transparent. Magic Video 2010 is a new and very exciting video editor/renderer which has many new features as well as many enhancements and bug fixes. Magic Video is the next generation open source implementation of the Magic Video 2000 editing and renderer. Magic Video 2010 allows the user to build video files from scratch, to render from scratch, or to create special effect video files. Magic Video is supplied with extensive tools which allow the user to enhance and manipulate their own videos in endless ways. You can view the final video/picture before saving it, open the project in Magic Video, or even preview the project while editing without the need for open files! The user can save the project to a file or a folder. Magic Video allows unlimited number of files, and movies to be saved. Magic Video 2010 is written in pure C++ and uses the latest GDI+ (GDI+ 2.0+) library. The most recent version of DirectShow API is used. The project is licensed under the GNU General Public License (GPL) version 2. You can find Magic Video 2010 on SourceForge.net (Forge.net): Or you can download a copy for evaluation from our website: This is version 3.0 of Magic Video. The name is Magic Video 2010, because v2.0 was released in 2005, I think 2.0 was the most important release. Magic Video 2010 has many features and enhancements, plus a lot of bug fixes and fixes which should ensure users that Magic Video 2010 does what it says it does. Here is a list of all the features:

- Magic Video is a complete completely new video editing/renderer. Magic Video is written from scratch, and uses modern C++ with updated GDI+ and DirectShow libraries.
- Magic Video is supplied with extensive tools which allow the user to enhance and manipulate their own videos in endless ways. The user can view

What's New in the Text Video?

This software creates a very informative and unique presentation of multimedia content. The software uses the advanced technology for video encoding and decoding, and allows creating web site with the text movies in the original video format with a graphic and text interface. The software allows you to combine and convert video files (*.avi) to this text format (*.txv). Text video file can be played in a text (80x50) and graphic (320x200) mode. The software enables to add or remove the text/graphics subtitles and select from a variety of graphic effects, to create an exciting movie presentation. IMPORTANT!
